4.- Family counselling.

Conceptualisation. Establishment of guidelines and habits in the family framework. Solving conflicts.

4. COURSE DESCRIPTION AND TEACHING METHODOLOGY

The methodological strategies will depend on the different contents presented in the programme, the resources available and the participative attitude of the students.

The lecture will be combined as an introductory strategy to the subjects with independent work and tutoring, so that the teacher has a broad knowledge of the students.

Students with special educational needs should contact the Student Attention Service (Servicio de Atención y Ayudas al Estudiante) in order to receive the appropriate academic support

5. ASSESSMENT METHODOLOGY

It is necessary **to obtain at least 50% in all the weights mentioned in the evaluation system section in order to pass the course**, and the grade for each of the criteria cannot be added up if any of them does not reach at least 50%.

Any student who, **for justified reasons**, cannot follow the normal face-to-face assessment system may take advantage of a final **SINGLE-NON-FACE-TO-FACE ASSESSMENT** system which will be carried out in a single academic act (official exam date) which may include as many tests as necessary to accredit that the student has acquired all the competences described in the subject's teaching guide. **It is compulsory for students** to establish face-to-face contact during tutorial hours so that the teaching staff can provide them with detailed indications of what the assessment system entails in their circumstances.

In the "normal-attendance" option, the practical grades will be respected for the next sitting of the same academic year. In the "single-unattended" system, the different sections to be passed must be passed in the same call of the academic year.

8. VIRTUAL / CLASSROOM TEACHING SCENARIO

Teaching methodology

1) Development of 30 theory sessions on the contents of the program. The methodology will be eminently active and participatory, for this the students will work in a group and individually the topics related to the subject. The sessions will last one hour each. When possible, theoretical classes will be given in person (up to 50%), as long as the number of students does not exceed the capacity allowed in the classroom, (taking into account the interpersonal distance determined by the health authorities). If all the sanitary and technical conditions are met, face-to-face assistance will be given with the periodic rotation of students.

2) Development of 15 sessions of practices and resolution of problems or exercises, through group work, with active and collaborative methodology. These sessions will be given under the same conditions specified for the theoretical sessions.

3) Tutorials: They will be carried out by videoconferences (synchronously) and by email (asynchronous).

NOTE: The teaching staff reserves the right not to give consent for the capture, publication, retransmission, or reproduction of their speech, image, voice and explanations of chair, in the exercise of their teaching functions, in the field of the University of Jaén.

Continuous evaluation with final exam:

1) The theoretical and practical contents may be evaluated through written tests and works. The teaching staff will inform about the evaluation criteria. Attendance and active participation in all activities proposed by the teacher will be valued. Delivery of the works with suitability and punctuality. The quality of the information and its originality will be assessed (an anti-plagiarism program will be used), in addition to the structure of the work, spelling and presentation. The teacher's observation and notes will also be used. The percentage of the continuous evaluation will be 60% of the final grade.

2) Theoretical exam. It will be a test type exam, with time control. The exam will be worth 40% of the final grade.

NOTE: Any student who, for good cause, cannot participate in practical and theoretical activities regularly, may benefit from an alternative assessment system. The theory corresponds to 70% of the overall grade and the practice with 30% (the student must pass both parts to pass the subject). To benefit from this system, it is mandatory that students establish face-to-face contact during tutoring hours (in the first fortnight of the beginning of the semester).

In both systems of evaluation, the different evaluable sections must be passed in the same academic year.

9. VIRTUAL TEACHING SCENARIO

Teaching methodology

1) Development of 30 theory sessions on the contents of the program. The sessions will consist of participatory classes, each lasting one hour, made by video conference. The classes will be given in full in the online format, not in person.

2) Practice sessions and problem/exercise resolution: They will consist of 15 online sessions, synchronously lasting one hour each.

3) Tutorials: They will be carried out by videoconferences (synchronously) and by email (asynchronous).

NOTE: The teaching staff reserves the right not to give consent for the capture, publication, retransmission, or reproduction of their speech, image, voice and explanations of chair, in the exercise of their teaching functions, in the field of the University of Jaén.

Continuous evaluation with final exam:

1) Continuous evaluation in online format (not face-to-face) will be given both synchronous and asynchronous. Attendance and active participation in all activities proposed by the teacher will be assessed. Delivery of the works with suitability and punctuality. The quality of the information and its originality will be assessed (an anti-plagiarism program will be used), in addition to the structure of the work, spelling and presentation. The teacher's observation and notes will also be used. The percentage of the continuous evaluation will be 50% of the final grade.

2) Theoretical exam. It will be a test type exam, with time control. The exam will be worth 50% of the final grade.

NOTE: Any student who, for good cause, cannot participate in practical and theoretical activities regularly, may benefit from an alternative assessment system. The theory corresponds to 70% of the overall grade and the practice with 30% (the student must pass both parts to pass the subject). To benefit from this system, it is mandatory that students establish face-to-face contact during tutoring hours (in the first fortnight of the beginning of the semester).

In both systems of evaluation, the different evaluable sections must be passed in the same academic year.
